## Favorit Parsley

*Petroselinum crispum 'Favorit'*

Height: 12 inches

Spread: 18 inches

Spacing: 14 inches

Sunlight: ☉

Hardiness Zone: (annual)

### Description:

This fast growing variety produces aromatic, double curled foliage that is deep green; when mature, it holds for a long time making harvesting easy; use in soups, salads or as a garnish; requires a well prepared fertilized soil and even moisture

### Edible Qualities

Favorit Parsley is an annual herb that is commonly grown for its edible qualities. The fragrant ferny compound dark green leaves can be harvested at any time in the season. The leaves have a pleasant taste and a pleasant fragrance.

The leaves are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking
- Drying
- Seasoning

### Planting & Growing

Favorit Parsley will grow to be about 12 inches tall at maturity, with a spread of 18 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 14 inches apart. Although it's not a true annual, this fast-growing plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant is typically grown in a designated herb garden. It should only be grown in full sunlight. It prefers to grow in average to moist conditions, and shouldn't be allowed to dry out. It is not particular as to soil pH, but grows best in rich soils. It is highly tolerant of urban pollution and will even thrive in inner city environments. This is a selected variety of a species not originally from North America.

Favorit Parsley is a good choice for the edible garden, but it is also well-suited for use in outdoor pots and containers. It is often used as a 'filler' in the 'spiller-thriller-filler' container combination, providing a canvas of foliage against which the thriller plants stand out. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
