

Mr. Big Garden Pea

Pisum sativum 'Mr. Big'

Height: 3 feet

Spread: 8 inches

Spacing: 3 inches

Sunlight:

Hardiness Zone: (annual)

Description:

A high yielding and early maturing variety, ideal for gardens or large containers; indeterminate vines produce 5" long, dark green pods with slight curve; easy to shell sweet peas, great for steaming, boiling or adding to pastas; trellising is recommended

Edible Qualities

Mr. Big Garden Pea is an annual vegetable plant that is commonly grown for its edible qualities. It produces pods of green pods which are typically harvested when mature. The pods have a sweet taste and a crisp texture.

The pods are most often used in the following ways:

- Fresh Eating
- Eating When Cooked/Prepared
- Cooking
- Baking
- Freezing

Planting & Growing

Mr. Big Garden Pea will grow to be about 3 feet tall at maturity, with a spread of 8 inches. When planted in rows, individual plants should be spaced approximately 3 inches apart. Because of its vigorous growth habit, it may require staking or supplemental support. This fast-growing vegetable plant is an annual, which means that it will grow for one season in your garden and then die after producing a crop.

This plant is typically grown in a designated vegetable garden. It does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. Consider applying a thick mulch around the root zone over the growing season to conserve soil moisture. This is a selected variety of a species not originally from North America.

Mr. Big Garden Pea is a good choice for the vegetable garden, but it is also well-suited for use in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
